

Postman – Assignment: Successful execution of the collection:

The screenshot displays the Postman interface with the 'S01-Text to Audio' collection item selected. The request is a POST to `https://api.groq.com/openai/v1/audio/speech`. The JSON body is as follows:

```
1 {
2   "model": "canopylabs/orpheus-v1-english",
3   "input": "[Cheerful] vanakkam. I am a language model created by Groq. I am here to help you with any questions you may have. How can I assist you today?",
4   "voice": "diana",
5   "response_format": "wav"
6 }
```

The response is a 200 OK status, with a response time of 1.51 s and a size of 402.35 KB. Below the response, there is a visualization of the audio response, showing a waveform and a play button. The right sidebar contains a 'Help' section with instructions on how to create the environment and fix the Authorization header.

The screenshot displays the Postman interface with the 'S02-MultiLingual' collection item selected. The request is a POST to `https://api.groq.com/openai/v1/chat/completions`. The JSON body is as follows:

```
1 {
2   "model": "llama-3.3-70b-versatile",
3   "messages": [
4     {
5       "role": "system",
6       "content": "You are an API Specialist. Always respond in the same language as the user."
7     },
8     {
9       "role": "user",
10      "content": "யிசுவம் நன்றி! இந்த API-ஐ எப்படி பயன்படுத்துவது என்று சொல்லுங்கள்."
11     }
12   ]
13 }
```

The response is a 200 OK status, with a response time of 3.11 s and a size of 1.63 KB. Below the response, there is a visualization of the JSON response, showing the chat completion details. The right sidebar contains a 'Help' section with instructions on how to create the environment and fix the Authorization header.

Achieving Success...

Help me get to a successful response. If the response succeeds, help me make it more useful.

Todos (0/3)

Create environment with GROQ_API_KEY variable and fix Authorization header

Send the request and verify a successful response

Add a visualization script to make the audio response playable

key to create the environment. Could you share your GROQ_API_KEY? You can find it at console.groq.com/key

Once you provide it, I'll:

1. Create a Groq environment with the key stored securely as a secret variable

2. Fix the Authorization header to use {{GROQ_API_KEY}}

3. Send the request and verify it works

4. Add a visualization script so the WAV audio response is playable directly inside Postman
